Basis of this opinion

1. With regard to the language, this opinion has been established on the basis of the international application in the language in which it was filed, unless otherwise indicated under this item.

☐

This opinion has been established on the basis of a translation from the original language into the following language

_____, which is the language of a translation furnished for the purposes of international search (under Rule 12.3 and 23.1(b)).

2. With regard to any nucleotide and/or amino acid sequence disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of:

a. type of material

☐

a sequence listing

☐

table(s) related to the sequence listing

b. format of material

☐

in written format

☐

in computer readable form

c. time of filing/furnishing

☐

contained in the international application as filed.

☐

filed together with the international application in computer readable form.

☐

furnished subsequently to this Authority for the purposes of search.

3. ☐ In addition, in the case that more than one version or copy of a sequence listing and/or table(s) relating thereto has been filed or furnished, the required statements that the information in the subsequent or additional copies is identical to that in the application as filed or does not go beyond the application as filed, as appropriate, were furnished.

Document 2: JP 9-282288 A (Fujitsu Limited)
31 October 1997, pages 4-6 (Family: none)

Document 3: JP 10-97437 A (Nippon Steel Corporation)
14 April 1998, paragraph 13 (Family: none)

A parameter adjustment device of the inventions relating to claims 1, 3 and 5 does not appear to be novel or involve an inventive step based on a parallel computer of document 1 cited in the ISR. "PE," means for executing 903 in Fig. 12, means for executing processes 492-494 in Fig. 7, large area determination in Fig. 7, and END in Fig. 7 respectively correspond to processing means, process assignment means, local search, intermediate result, and end determination in claims 1, 3 and 5.

The invention relating to claim 2 does not appear to involve an inventive step based on document 1, and document 2 cited in the ISR. In the parallel computer of document 1, assigning jobs in accordance with a processor capability as described in document 2 (corresponding to the search process in claim 2) would be easy.

The invention relating to claim 4 does not appear to involve an inventive step based on document 1, and document 3 cited in the ISR. In the parallel computer of document 1, assigning data (corresponding to the number of individuals in claim 4) in accordance with a processor capability as described in document 3 (paragraph 13) would be easy.
